

## **Stora Rödde wild boar enclosure, 3.7km or 1.5km**

Park in the road cross Simontorps Säteriväg/ Röddevägen, not in the yard. There's room for 2-3 cars in the curve right after the road cross. The wild boar enclosure can also be reached by bike via Prästavägen and Simontorps Säteriväg (5km one way). Please follow the detailed bike directions from "The Mushroom" and Lilla Rödde". It is forbidden to bring a dogs in the enclosure. The area is a biotope protected nature reserve.

Enter through the spinning gate. (Directly to the right after the gate/cattle grid is a smaller, separate enclosure where you definitely can observe wild boar in close up.)

The tractor path divides after about 250m; Hold left for the 3.7km round trip (or right for the short alternative). The dirt road bends around the small nature reserve. On the right side runs a small brook, Avelsbäcken in a gorge. During late summer there are plenty of chanterelle in the gully. Keep right on the wider dirt road at a split and right again opposite Stampen (see the map). This road leads back to the gate.
